

**FLASH**

# Seamless access, total control.

Enhance your access control and security by seamlessly integrating parking garage entry with access to your adjacent or connected building. Ideal for office buildings, residential complexes, and industrial facilities.

## Built for a Seamless Access + Entry Experience

- Enter the building with the same credential that you use at the garage, including ticket, credit card\*, access card and more, catering to both monthly tenants and transient parkers.
- Intuitive interface and design guarantee effortless operation for users of all skill levels.
- Built-in camera and intercom allow for superior customer service and support.

## Cloud-connected for Total Control

- Seamlessly integrate with current access control systems for a smooth upgrade to security protocols.
- Select third-party call center and building integrations available.
- All configurable through a cloud-born operating system.

## Engineered for Versatility and Dependability

- Constructed with high-quality materials to guarantee enduring performance.
- A sophisticated powder-coated silver finish comes as standard, with the option of customizable wraps to enhance your branded experience.
- ADA compliant with convenient wall or gooseneck mounting options.

\* Credit card can be used as a credential at the pedestrian door reader if the in-lane kiosks have MSR (Mag Strip Readers). Credit card as an entry credential will be deactivated if the entry kiosks utilize EMV. The pedestrian door reader cannot be manufactured with an EMV reader.

Flash Pedestrian Door Reader requires 24vdc with peak current draw of 4.2A. A step down transformer from 120vac to 24vdc is provided free of charge with the purchase of this unit. This MeanWell MPM-90-24 transformer must be housed outside of the Pedestrian Door Reader if 24vdc is not available from a local source, such as the door itself. Please coordinate with your salesperson or project manager.
